# Message From The Proprietor

*Ahlan Sumon Talukdar*  
Proprietor

As Proprietor of CHAYON Associates, I firmly believe that if we can achieve a place in the heart & mind of our customers as a provider of innovative solutions for integrated communities that suit every need and fulfill all dreams, the possibilities for the growth of Delta will be unlimited no matter how challenging the real estate environment.

Delta is a business truly capable of benefiting and profiting both society and our shareholders.

I would like to take this opportunity to pledge that I and the Delta team will endeavor to devote our full efforts to exceed our customers' expectations & fully satisfy their needs and requirements.

Thank you.

# About Company

We are leading International Construction company in the world

Chayon Associates is one of the world's leading infrastructure groups when it comes to sustainability. Now we are taking another big step forward. We will continue to expand our leading role in relation to ESG (Environmental, Social and Governance).

# Our Service

We build on our reputation of excellence. Our collaborative, client-focused approach to commercial construction creates value for our partners while maintaining our high-quality standards.

## Road Construction

Construction of roads involves the paving, rehabilitation, and/or reclamation of degraded pavements in order to achieve a state of good repair and increase road traffic safety. Road construction involves the use of asphalt, concrete, and other road repair materials.

## Building Construction

Construction is the process of constructing a building or infrastructure. Construction differs from manufacturing in that manufacturing typically involves mass production of similar items without a designated purchaser, while construction typically takes place on location for a known client.

## Bridge Construction

We offer the whole range of expertise from preliminary design to execution for balanced cantilever, incremental launching, advanced shoring (MSS), span-by-span techniques and related methods, and maintain a complete range of bridge construction equipment.

## Culvert Construction

It is a transverse and totally enclosed drain under a road or railway. OR A water course totally enclosed and usually of a size through which a man can pass OR An opening through an embankment for the conveyance of water by mean of pipe or an enclosed channel.

# Our Work Process
